

< PE TAPE SOLUTIONS >

BARRIER CONTAINMENT

Building containment is an essential element of public safety. With building containment isolation systems, it is vital to choose the right tape to achieve an airtight seal and give full user confidence in safety critical applications. Polyflex PE film tape is used extensively for containment systems, offering a superior product designed to cope with the rigorous demands of these difficult jobs.

Scapa Polyflex 133 PE film tape is a highly effective alternative to cloth tapes, particularly in harsh conditions and low temperature environments, offering greater flexibility and conformability than traditional cloth tapes, especially on rough and uneven surfaces.

Polyflex 133 is used extensively in quarantine environments to provide superior contact to uneven surfaces and difficult

substrates such as poly sheeting film, exceeding end user expectations with its smooth surface, clean application, low stretch and easy to tear properties.

Scapa has extensive experience in supplying the containment market segment with the Polyflex branded range and is highly regarded in this field. Scapa's Renfrew, Ontario, Canada manufacturing facility is established as the global center of excellence for PE tape manufacture with unrivaled technical capabilities including in-house extrusion of polyethylene.

Industrial

Key Features and Benefits:

- Aggressive adhesive for superior bonding and heavy duty protection
- Superior tack and consistent bonding for hazmat applications
- Immediate and long-term adhesion to a wide range of surfaces and substrates
- Premium rubber based adhesive formulation allows clean peel of tape, even after extended periods
- Creates a watertight seal and provides humidity resistance in all weather and climate conditions
- Excellent conformability and product flexibility for rough surfaces, awkward shaped objects and angles
- Available with serrated edges for easy tear
- Longer service life than traditional tape options
- Red and white options for ease of identification and on-site visibility

Product Construction:

Polyflex 133 is a 7.5 mils / 0.19 mm thick specialist PE film tape, coated with a specially developed rubber resin based adhesive.

Barrier Containment Applications:

- Sealing building and barrier containment areas
- Sealing protective clothing onto the body
- Sealing of polyethylene waste and debris bags
- Airtight packing of hazardous or other contaminated materials
- Bonding of PE sheeting within containment areas

About Scapa:

Scapa Group plc is a leading global manufacturer of bonding products and adhesive components in the Healthcare and Industrial markets. Scapa has a global footprint, with production sites in Europe, North America and Asia. Our worldwide service and supply chain capabilities place us in an excellent position to partner with global customers.

Recommended Product: Polyflex 133

Product	Adhesion to Backing (Oz/Inch)	Adhesion to Steel (Oz/Inch)	Tensile Strength (Lb/Inch)	Additional Properties	Brand	Widths (mm)	Length (m)	Colors
Polyflex 133	35	75	24	Clean removal Serrated edge	Made In Canada	48/72/96	55	Red / White
